

ExCeL London Sustainability Policy 2022

ExCeL London is one of the UK's leading international exhibition and convention centres hosting over 400 events a year and welcoming 4 million visitors from across the globe. We are committed to being thought leaders in our market and providing world-class facilities and services.

We recognise sustainable development as fundamental to our success and endeavour to operate as a responsible corporate business. Our vision is to be a sustainability leader within our industry by shaping the future of events into one that is net zero, resource efficient and equitable.

To achieve this, ExCeL London aims to achieve internationally recognised standards for sustainability, with a focus on five key areas:

- Climate Action
- Resource Efficiency
- Client Engagement
- Community Engagement
- Our People & Value Chain

Climate Action

To protect our environment and minimise our contribution to the effects of climate change, we aim to:

- Meet and exceed our targets as a signatory of the Net Zero Carbon Events Pledge
- Minimise our operational emissions by procuring 100% renewable electricity and a green gas supply which is offset using UN Carbon Credits
- Reduce our residual emissions through operational efficiencies and new technologies
- Deliver low carbon event space to our clients
- Provide guidance to clients for reducing the embodied carbon of events production

Resource Efficiency

To operate with consideration of the environment and consumption of resources, we aim to:

- Continue to apply waste hierarchy principles and limit the production of waste
- Apply a proactive management approach towards minimising the use of energy and water consumption throughout our venue, management office and other business operations

Client Engagement

To educate and enable our clients to make sustainable choices, we aim to:

- Work with our clients to pursue, promote and develop sustainable practices and ways of working throughout the entire lifecycle of an event
- Provide guidance for limiting the use of consumables, reducing the amount of waste generated, selecting sustainable food choices and promoting the use sustainable materials
- Collaborate with clients to support their own sustainability objectives, as well as industry-wide commitments

ExCeL London Sustainability Policy 2022

Community Engagement

To maximise our positive impact on our local community and add value to wider society, we aim to:

- Communicate openly, honestly, and effectively with both internal and external stakeholders, encouraging them to embrace sustainable ways of living
- Support our local community through providing local employment opportunities, sourcing local supplies where possible and supporting local community projects

Our People & Value Chain

To attract and retain talent, both within our direct business and across our value chain, we aim to:

- Ensure the full implementation of this policy throughout all departments, business operations and services, and throughout our value chain where possible
- Ensure the policy and related sustainability issues are discussed with all employees and suppliers, ensuring full awareness of our commitment to measuring and improving our performance

We will endorse practices that support economic security, social welfare and environmental responsibility and will continuously seek to develop initiatives in collaboration with our clients and suppliers to improve sustainability performance.

This policy and our Sustainability Management System are supported by our Executive Team and owners, ADNEC. Our Executive Team and senior managers are accountable for ensuring objectives are set, monitored, and measured regularly, whilst all ExCeL London staff are responsible for implementing this policy into their day-to-day activities.

Date: 1st June 2022
