

Exhibitor manual

Piped services

If your stand includes a kitchen or food service area or beauty treatment/demo zone, you may need access to **piped water and waste connections**. You can also hire equipment such as **sinks, dishwashers, or water heaters** through [Excel's Webshop](#) or contact the [Excel Exhibitor Services team](#).

Important for hygiene and safety:

To maintain high health and safety standards, we strongly recommend using a proper plumbed sink for all food handling or preparation. **Foot-pump sinks do not provide adequate water flow for effective hand washing** and are not suitable for use in food service environments.

Don't forget:

- **Place your order at least 28 days before tenancy begins** to benefit from the advance order rate.
- If your appliance or equipment requires **power**, you'll need to arrange this separately with the event's appointed **electrical contractor**.
